Stainless Steel Cleaning Method

Routine cleaning – Use detergent or soap and water.

wipe with a sponge or cotton cloth.

Rinse thoroughly and wipe dry.

Fingerprints – Use detergent, soap and warm water or organic solvent (eg. acetone, alcohol)

Rinse thoroughly and wipe dry.

Grease Mark & Oil – Wipe off the grease by soft cloth.

Baked – on grease can softened with Ammonia.

Then clean after with organic solvent or soap and water.

Rinse with water and wipe dry.

Do not use chlorinated chemicals, bleaching agents or abrasive cleaners.

Use and maintenance guidelines:

1. Using soft cotton clothe directly or with tape water to clean the surface, then dry the surface.
2. Do not use acidic solvent alkaline solvent or even thinner to clean the surface.
3. Do not use the sandpaper and things tough like this to clean the surface.
4. Do not let the PVC protective layer stay on the stainless steel surface for more than 90 days from the date of delivery in order to avoid leaving the remains of the adhesive glue on the stainless steel surface.
